Need a quick summary of a document?

Use eSummary!

eSummary is the European Commission's new AI-powered online language tool. It is provided by DGT in collaboration with DG CONNECT as part of the **Digital Europe Programme**.

It can support your day-to-day work by giving you quick overviews of the contents of internal documents or documents received from Member States, citizens, companies, or any other organisation. It works from and into any official EU language as well as Arabic, Chinese, Icelandic, Japanese, Norwegian, Russian, Turkish and Ukrainian.

What to expect from eSummary?

You can submit documents of any volume and in any common format to eSummary – Word, PDF, etc. It will produce a summary about 10% as long as the original, but no longer than 3 pages. You can download the summary file as a Word document from the interface. It might be enough for your needs on its own, or it can help you decide if you want to send the document to eTranslation or request a full human translation of the document or parts of it.

Who can use it?

eSummary is not restricted to EU institutions. It is available to public administrations, universities, EU freelance translators, SMEs, NGOs, and projects financed by the Digital Europe Programme, in the EU, Iceland, Norway, Liechtenstein and Ukraine.

Is it safe to use eSummary? Yes.

Data is processed in the existing and secure eTranslation environment and deleted after processing. You retain ownership of your data, and we do not share it with third parties. However, documents marked as EU Restricted or higher should not be sent to eSummary.

How to use eSummary:

1 EU staff:

- ✓ Go to our Language Tools Hub and choose eSummary

2 Other eligible users:

- ✓ Register on our registration website

- ✓ Go to our Language Tools Hub and choose eSummary
